

ME 405 Textbook

Prepared by Professor J. M. Cimbala, Penn State University. Latest revision: 24 August 2020

General information about the textbook:

- The textbook for this course is recommended, not required, but you are encouraged to download it and read it.
- Title: *Indoor Air Quality Engineering: Environmental Health and Control of Indoor Pollutants*.
- Authors: R. J. Heinsohn and J. M. Cimbala, Marcel Dekker, Inc., New York, 2003.

Website for the textbook (for Errata sheet and other information):

https://www.me.psu.edu/cimbala/Heinsohn_Cimbala_book/index.htm

Other information:

- Other notes and articles will be provided by the instructor.
- *Note*: This Indoor Air Quality Engineering textbook is available for FREE for PSU students through the PSU Library system. You may need to enter the website through the library. Make sure you log in with your PSU credentials since it is for PSU students only.
- Procedure to download the book (thanks to Ian Rathgeb!):
 - Access the Penn State Library Catalog via <https://catalog.libraries.psu.edu/catalog/21274399>
 - Click the link to the right of 'Access Online'
 - Download textbook
- *Note*: Some browsers require you to open this link in a new tab or new window. Let me know if you need to take any other special steps to be able to download the book, and I will share that information with everyone.
- Alternate download site. Here is the direct download website: <http://www.crcnetbase.com/doi/book/10.1201/9780203911693>
- *Note*: If the above link does not work, copy and paste it into your browser.
